

2018
New **FREE**
service

Wastewater pumping

This year, to go one step further with its **green initiative**, Île d'Yeu harbour has acquired a **wastewater pumping station**, located at the entrance to the harbour.

The Chamber of Commerce and Industry (CCI) provided this facility with support from the Vendée Départemental Council and the Loire-Bretagne Water Agency.

The pumping station is **self-service, available 24/7** and completely **free**. Your wastewater will be collected and treated. By using this station, you will contribute to preserving the quality of the water in the harbour.

So, please don't hesitate to use it !

The Île d'Yeu, also includes...

Two Natura 2000 areas

- The first for protecting its **rocky plateau, dunes and marsh,**

- The second for its **marine environment.**

Together, let's preserve the ecological diversity and beauty of Île d'Yeu !

I'm taking part in "Vendée propre" for a clean Vendée !

Objective **Zero waste**

Guide for green sailors

As a **green sailor**, and through your involvement, you are contributing to the preservation of the coastline and the maritime environment.

Let's all take part in the initiative together!

In this mini-guide, you will find all the information needed to simplify your daily life and to help us reach our...

Objective **Zero waste**

THANK YOU !

Household waste collection point

I'm taking part in "Vendée propre" for a clean Vendée !

All these facilities are **self-service, available 24/7** and completely **free**.

For several years now, the Île d'Yeu harbour has been working on strengthening its commitment to protecting the sea and the aquatic environment.

Because of this, at the quay, you will find all the equipment needed to do your part for the **green sailor initiative !**

Wastewater

Use the pumping station (*located at the entrance to the harbour*) and by doing so, contribute to preserving the quality of the water in the harbour; your wastewater will be collected and treated.

- **Greywater** (*water used for washing*), which is full of detergents, limits oxygen exchanges between the air and water. This causes algal bloom, alters the fauna and flora and saturates the environment.
- **Blackwater** (*wastewater from toilets*), sometimes discharged close to swimming areas, contains bacteria, viruses and parasites and can cause significant health risks for humans and the surrounding marine environment.

Domestic waste

Did you know ? **The Vendée is great at recycling !**

- **Recycling** : the recycling points are colour-coded

YELLOW
plastic packaging

GREEN
glass

BLUE
paper and cardboard

- **Household waste** : what is left after you have recycled what you can. It is collected in the refuse bin provided for this purpose.

ATTENTION, for bin bags of household waste only.

For all other types of waste, please contact the harbour master's office or visit the following website: www.dechets.ile-yeu.fr.
